- Gathering of People
- Building Grading (Satellite 30/05/2012)**
- Completely Destroyed (EMS 5)
- Moderately Affected (EMS 4, 3, 2)
- Building Grading (Aerial 22/05/2012)**
- Completely Destroyed (EMS 5)
- Moderately Affected (EMS 4, 3, 2)
- Not Affected
- Transportation**
- Secondary Route
- Local Route
- Other
- Railway
- Points of Interest**
- Institutional
- Educational
- Recreational

Affected population 6500 inhabitants (estimated)

Destroyed assets 27 Buildings

Damaged assets 206 Buildings

	Destroyed	Damaged	Destroyed	Damaged
Residential	15	175	Educational	0
Industrial	6	18	Medical	0
Commercial	0	3	Recreational	1
Institutional	0	2	Religious	0
Multi-Functional	1	0	Transportation	0
Other	4	5	Military	0

Map Information

An earthquake with a magnitude 5.8 killed at least 16 people in northern Italy on 29/05/2012, damaging buildings and leaving 14,000 people homeless in the Emilia Romagna region north of Bologna, one of Italy most agriculturally and industrially productive areas. The epicentre of the earthquake, which struck at depth of 9.6 km (6 miles), was less than 30 km (19 miles) from Modena, not far from where the magnitude 6 earthquake struck on 20th May (Source: Glide Number).

The core users of the map are Civil Protection authorities involved in operations in the field. The aim of the map production is to support the emergency response activities.

Data Sources

Background imagery: WorldView-02 © DigitalGlobe (0% cloudy, 0.6 m resolution, acquired on 30/05/2012)

LandScan (GUT BATTELLE, LLC, 2010 (ca 1km resolution))

Base vector layers based on Openstreetmap and Wikimapia refined by ITHACA (nominal scale 1:5000).

All Data sources are complete and with no gaps.

Dissemination/Publication

No restrictions on the publication of the mapping apply.

Delivery formats are GeoTIFF, GeoPDF, GeoJPEG and vectors (shapefile and KML formats).

Framework

The products elaborated for this rapid mapping have been realized to the best of our ability, within a very short time frame during a crisis, optimizing the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original data sources. The products are compliant with GIO-EMS RUSH Product Portfolio specifications.

Map production

The present map shows an updating of a building damage assessment in the area of San Felice, ITALY, after 29/05/2012 aftershock. The previous assessment, based on aerial imagery acquired on 23/05/2012 (spatial resolution 0.07 m) and with an estimated thematic accuracy of 85%, has been updated by means of visual interpretation of post-event WorldView-02 satellite imagery acquired on 30/05/2012 (spatial resolution 0.6 m). Grading classes are based on EMS-98 damage grades, specifically: Completely Destroyed (EMS-98 Grade 5), Damaged (EMS-98 Grade 2-4), Not Affected.

Post-event satellite image have been orthorectified using RPC model and SRTM elevation data.

The estimated geometric accuracy of this product is 5m CE90 or better, from native positional accuracy of the background orthoimage.

The estimated thematic accuracy of the updating is 60% or better, as it is based on visual interpretation of recognizable items on very high resolution satellite imagery. The overall estimated thematic accuracy is in the range 60-85% due to the use of two different post event data sources.

Map produced on 31/05/2012 by e-GEOS under contract 257219 with the European Commission. All products are © of the European Commission.
