Estimated population		inhabitants	87500
Settlements	Industrial	ha	137,7
	Commercial	ha	0,1
	Residential	ha	1708,7
	Recreational	ha	6,6
	Transportation	ha	34,5
	Green Area	ha	2,1
Utilities	Quarry	ha	76,6
	Extraction Mine	ha	0,2
	Processing Facility	ha	41,6
Transportation	Primary	km	41,9
	Secondary	km	34,0
	Local Road	km	210,8
	Railway	km	41,5

Map Information
Inset maps based on: Administrative boundaries (JRC 2013, GISCO 2010, © EuroGeographics), Hydrology, Transportation (Natural Earth, 2012, CCM River DB © EU-JRC 2007), Settlements (Geonames, 2013).
Population data: Landsat 2010 © UT BATTELLE, LLC.
Elevation data: SRTM (90m posting). Height in meters above mean sea level.
All Data sources are complete and with no gaps.

Data Sources
Base vector layers based on OpenStreetMap © OpenStreetMap contributors, refined by GAF AG. Source information is included in vector data.
Population data: Landsat 2010 © UT BATTELLE, LLC.
Elevation data: SRTM (90m posting). Height in meters above mean sea level.
All Data sources are complete and with no gaps.

Dissemination/Publication
No restrictions on the publication of the mapping apply.
Delivery formats are GeoTIFF, GeoPDF, GeoPEG and vectors (shapefile and KML formats).

Framework
The products elaborated in the framework of current mapping in rush mode activation are realized to the best of our ability, within a very short time frame during a crisis, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original data sources. The products are compliant with GIO-EMS RUSH Product Portfolio specifications.

Map Production
The present map shows basic topographic features such as transportation, hydrology and settlements in the area of Doboj (BOSNIA AND HERZEGOVINA). These basic topographic features are derived from public datasets, refined by means of visual interpretation of pre-event orthorectified imagery from RapidEye © Blackbridge (acquired on 23/10/2013, GSD 6.5m, 0% cloud coverage).
All satellite images have been radiometrically enhanced and orthorectified with RPC approach (using SRTM elevation data).
The estimated geometric accuracy of this product is 45m CE90 or better, from native positional accuracy of the background satellite image.
The estimated thematic accuracy of this product is 85% or better, as it is based on visual interpretation of recognizable items on high resolution optical imagery. Shadowed areas are zones of lower interpretation accuracy due to the poorer image radiometry.
Only the area enclosed by the Area of Interest has been analyzed.
Map produced on 17/05/2014 by GAF AG under contract 257219 with the European Commission. All products are © of the European Commission.
Name of the release inspector (quality control): GAF AG (ODO).
