

GLIDE number: N/A Activation ID: EMSR-101
Product N.: 03LEGRAD_v1

LEGRAD - CROATIA
Flood - 14/09/2014
Reference Map - Detail

Production date: 18/09/2014

Cartographic Information

1:12000 Full color ISO A1, medium resolution (200 dpi)

Grid: WGS 1984 UTM Zone 33N map coordinate system
Tick marks: WGS 84 geographical coordinate system

Legend

General Information	Hydrology
 Area of Interest	— Stream
 Residential	— Canal
 Cemetery	— Ditch
 Urbanized Multi-functional	 Lake
● Populated Place	— River

Exposure within the detail AOI			
Estimated population		inhabitants	2500
Settlements	Urbanized Multifunctional	ha	7.7
	Cemetery	ha	0.7
	Residential	ha	108.76

Map Information

Due to severe raining in last days, extremely high water level is recorded on almost all rivers in the northern part of Croatia. Several villages affected by floods have declared emergency situation. The Mura, Sava, Suda, Kupa and Lonja rivers have all flooded with Sava, rising up to the highest level that has been observed in the last decades. The core users of the maps are Disaster Response Authorities involved in operations.

Data Sources

Inset maps based on: Administrative boundaries (JRC 2013, GISCO 2010, © EuroGeographics), Hydrology, Transportation (Natural Earth, 2012, CCM River DB © EU-JRC 2007), Settlements (Geonames, 2013).
Background digital orthophotos © 2014 courtesy of Republic of Croatia (acquired in 2013, GSD 2 m). Landsat © USGS (acquired on 16/07/2014, GSD 15 m, 2% cloud coverage).
Base vector layers based on OpenStreetMap © OpenStreetMap contributors, Wikimapia.org, GeoNames (approx. 1:10000, extracted on 14/09/2014) refined by GAF AG. Source information is included in vector data.
Population data: Landsat 2010 © UT BATTELLE, LLC.
All Data sources are complete and with no gaps.

Dissemination/Publication

Delivery formats are GeoTIFF, GeoPDF, GeoJPEG and vectors (shapefile and KML formats).

Framework

The products elaborated in the framework of current mapping in rush mode activation are realized to the best of our ability, within a very short time frame during a crisis, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original data sources. The products are compliant with GIO-EMS RUSH Product Portfolio specifications.

Map Production

The present map shows basic topographic features such as hydrology and settlements in the area of Legrad (CROATIA). These basic topographic features are derived from public datasets, refined by means of visual interpretation of pre-event orthophotos © 2014 courtesy of Republic of Croatia.
The estimated thematic accuracy of this product is 85% or better, as it is based on visual interpretation of recognizable items on high resolution optical imagery. Shadowed areas are zones of lower interpretation accuracy due to the poorer image radiometry.
Only the area enclosed by the Area of Interest has been analyzed.
Map produced on 18/09/2014 by GAF AG under contract 257219 with the European Commission. All products are © of the European Commission.
Name of the release inspector (quality control): GAF AG (ODO).
