6°42'0"W

A major forest fire in southern Spain has forced the evacuation of more than 1.500 people from homes, campsites and hotels, according to a government official. Like much of Spain, the area in Huelva is on high alert for forest fires because of a heatwave. The fire started on Saturday night on Spain's southern coast, then advanced east to reach the Donana Nature Reserve, one of the country's most important wildlife sanctuaries and a UNESCO World Heritage site since 1994. The emergency services are working to contain the fire but windy conditions made it difficult to predict when the blaze would be brought completely under control.

6°41'0"W 706000

The present map shows the fire delineation in the area ofLos Cabezudos (Spain). The thematic layer has been derived from post-event satellite image by means of visual interpretation. The estimated geometric accuracy is 5 m CE90 or better, from native positional accuracy of the background satellite
