| Unchanged | |

The crisis layer has been derived by the analysis of the situation on 18/11/2018 and on 28/11/2018

Consequences within the AOI				
Stable Population	Unit of measurement		Total in AOI	
	Number of inhabitants		20422	
Tent camp	ha	1.1	0.5	0.5
	No.	234	1	330
Tent	ha	0.5	0.5	21.1
	No.	5648	1	5648

Map Information

The livelihoods of millions of Afghans are currently being decimated due to drought, which is affecting numerous provinces and regions across the country, and leading to the displacement of thousands of households that can no longer sustain themselves in their areas of origin, having had a failed harvest, lost livestock, and lacking water and livelihood opportunities. (Source: ReliefWeb) There is a risk of floods in the near future in the area where the IDP camps are located. The maps will be used to assess possible floods, the spread of the settlements and transport information if available.

The present map shows the current situation in the area of Kharistan (Afghanistan). The thematic layer has been derived from post-event satellite image by means of visual interpretation. The estimated geometric accuracy is 5 m CE90 or better, from native positional accuracy of the background satellite image.
