|---|--|
| Crisis Information | General Information |
| ■ New | Area of Interest |
| ■ Changed | Image Footprint |
| ■ No longer present | ○ Placename |
| ■ Unchanged | — Stream |
| ■ Tent camp | Land Subject to Inundation |
| ■ New | — Secondary Road |
| ■ Changed | — Local Road |
| ■ No longer present | — Cart Track |
| ■ Unchanged | |

The crisis layer has been derived by the analysis of the situation on 27/12/2018 and on 05/01/2018

Consequences within the AOI

Unit of measurement	new	changed	no longer present	unchanged
Tent camp	ha 0.9	1.1	0.0	38.8
Tent	No. 2143	456	1683	5589

Map Information
 The livelihoods of millions of Afghans are currently being decimated due to drought, which is affecting numerous provinces and regions across the country, and leading to the displacement of thousands of households that can no longer sustain themselves in their areas of origin, having had a failed harvest, lost livestock, and lacking water and livelihood opportunities. (Source: ReliefWeb) There is a risk of floods in the near future in the area where the IDP camps are located. The maps will be used to assess possible floods, the spread of the settlements and transport information if available.
 The present map shows the current situation in the area of Kharistan (Afghanistan). The thematic layer has been derived from post-event satellite image by means of visual interpretation. The estimated geometric accuracy is 5 m CE90 or better, from native positional accuracy of the background satellite image.
