Map Information

The livelihoods of millions of Afghans are currently being decimated due to drought, which is affecting numerous provinces and regions across the country, and leading to the displacement of thousands of households that can no longer sustain themselves in their areas of origin, having had a failed harvest, lost livestock, and lacking water and livelihood opportunities. Particularly hit are the provinces of Ghor and Badghis, who have generated new displacement in Qala e Naw, Badghis. (Source: ReliefWeb)

The present map shows the current situation in the area of Faristan and Shamal Daria (Afghanistan). The thematic layer has been derived from post-event satellite image by means of visual interpretation. The estimated geometric accuracy is 5 m CE90 or better, from native positional accuracy of the background satellite image.
