*The crisis layer has been derived by the analysis of the situation on 21/10/2018 and on 03/11/2018*

Consequences within the AOI				
	Unit of measurement	Total in AOI		
		new	changed	no longer present
Stable Population	Number of inhabitants	30723		
Tent camp	ha	1.6	11.4	0.1
Tent	No.	1650	3	944
				5037

**Map Information**

The livelihoods of millions of Afghans are currently being decimated due to drought, which is affecting numerous provinces and regions across the country, and leading to the displacement of thousands of households that can no longer sustain themselves in their areas of origin, having had a failed harvest, lost livestock, and lacking water and livelihood opportunities. Particularly hit are the provinces of Ghor and Badghis, who have generated new displacement in Qala e Naw, Badghis. (Source: ReliefWeb)

The present map shows the current situation in the area of Bogilar and Jarahos (Afghanistan). The thematic layer has been derived from post-event satellite image by means of visual interpretation. The estimated geometric accuracy is 5 m CE90 or better, from native positional accuracy of the background satellite image.
