*The crisis layer has been derived by the analysis of the situation on 13/11/2018 and on 22/11/2018*

**Consequences within the AOI**

Unit of measurement	new	changed	no longer present	unchanged
Tent camp	6.5	25.0	0.0	57.9
Tent	No. 3991	8	293	13850

**Map Information**

Herat, a city in western Afghanistan, is the current destination for a significant number of Internally Displaced People (IDP) leaving conflict and drought affected areas in northern Herat Province, Badkhis Province and Ghor Province. A massive ongoing drought highly affects agriculture, and the availability of food and water in villages of origin. Mass displacement is ongoing in the wider region and towards the regional city Herat. The EU Directorate General for European Civil Protection and Humanitarian Aid Operations (DG ECHO) is very concerned about the lack of basic needs and the high morbidity reported as well as the plight of those that are left in villages affected by the drought. To better reach out to beneficiaries, and to have updated data on their geographical location (people are moving), data from the EMS Rapid Mapping Component are needed. Maps will serve for operational analysis and directly improve the efficiency and effectiveness of the ECHO programmes.

The present map shows the current situation in the area of Shaidayee. The thematic layer has been derived from post-event satellite image using a by means of visual interpretation. The estimated geometric accuracy is 5 m CE90 or better, from native positional accuracy of the background satellite image.

**Relevant date records**

Event	15/06/2018	Situation as of	22/11/2018
Activation	13/07/2018	Map production	20/12/2018
