Legend

Crisis Information		Hydrography		Transportation	
■	Flooded Area (26/02/2020 06:47 UTC)		River		Primary Road
	Area of Interest		Stream		Secondary Road
	Administrative boundaries		Lake		Local Road
	Region		Open Water		Long-distance railway
	Placename		Reservoir		Airfield runway
	Built-Up Area		River		
	Built-Up Area				

Consequences within the AOI		Unit of measurement		Affected	Total in AOI
				ha	2207.5
Flooded area				2207.5	
Estimated population		Number of inhabitants			86162
Settlements	Residential Buildings	ha	1.5	2546.5	
	Industrial buildings	ha	0.0	154.6	
Transportation	Airfield runways	km	0.0	4.2	
	Primary Road	km	0.0	271.2	
	Secondary Road	km	0.0	337.2	
	Local Road	km	0.0	942.1	
	Long-distance railways	km	0.0	177.9	

Map Information

The Clare county was one of the worst affected areas during the flooding periods in 2015 and 2009. Since 20 February Ireland has been experiencing a series of Atlantic storms. Water levels along the River Shannon and River Fergus have risen after another night of heavy rain on 24 February. National authorities have issued a flood warning for the counties along the River Shannon and Rivers Fergus and Claureen. A number of houses in Co Clare village have been evacuated. A yellow snow and ice warning has been issued for the next days (until 26 February).

The present map shows the flood delineation in the area of Moy (Ireland). The thematic layer has been derived from post-event satellite image using a semi-automatic approach. The estimated geometric accuracy (RMSE) is 20 m or better, from native positional accuracy of the background satellite image.

Relevant date records (UTC)

Event	Date/Time	Situation as of	Date/Time

Disclaimer

Products elaborated in this Copernicus EMS Rapid Mapping activity are realized to the best of our ability, within a very short time frame, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original sources. No liability concerning the contents or the use thereof is assumed by the producer and by the European Union.
 Please be aware that the thematic accuracy might be lower in urban and forested areas due to inherent limitations of the SAR analysis technique.

Delivery formats are Layered Geospatial PDF, GeoJPEG and vector (ESRI shapefiles, Google Earth KML, GeoJSON).

Map produced by SIRS released by e-GEOS (ODD).
