### **Carrick on Shannon - IRELAND**

# Flood - Situation as of 26/02/2020

Delineation - Overview map 01

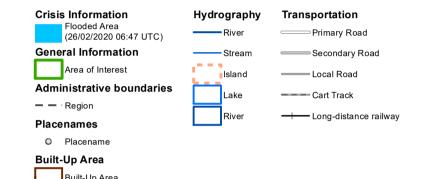

### Cartographic Information

Full color A1, 200 dpi resolution

#### Grid: WGS 1984 UTM Zone 29N map coordinate system Tick marks: WGS 84 geographical coordinate system

## Legend

		Unit of mea	surement	Affected	Total in AOI
Flooded area		ha 732.9		32.9	
Estimated population		Number of in	Number of inhabitants 19370		9370
Settlements	Residential Buildings		ha	1.0	678.1
Transportation	Primary Road		km	0.0	51.6
	Secondary Road		km	0.0	161.8
	Local Road		km	0.1	220.6
	Cart Track		km	0.6	1093.6
	Long-distance railways		km	0.0	36.9

#### Map Information

The Clare county was one of the worst affected areas during the flooding periods in 2015 and 2009. Since 20 February Ireland has been experiencing a series of Atlantic storms. Water levels along the River Shannon and River Fergus have risen after another night of heavy rain on 24 February. National authorities have issued a flood warning for the counties along the River Shannon and Rivers Fergus and Claureen. A number of houses in Co Clare village have been evacuated. A yellow snow and ice warning has been issued for the next days (until 26 February).

The present map shows the flood delineation in the area of Carrick on Shannon (Ireland). The thematic layer has been derived from post-event satellite image using a semi-automatic approach. The estimated geometric accuracy (RMSE) is 20 m or better, from native positional accuracy of the background satellite image.

# Disclaimer

Products elaborated in this Copernicus EMS Rapid Mapping activity are realized to the best of our ability, within a very short time frame, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original sources. No liability concerning the contents or the use thereof is assumed by the

producer and by the European Union.

Please be aware that the thematic accuracy might be lower in urban and forested areas due to inherent limitations of the SAR analysis technique.

Delivery formats are Layered Geospatial PDF, GeoJPEG and vector (ESRI shapefiles, Google Earth KML, GeoJSON).

Map produced by SIRS released by e-GEOS (ODO).
