

# Wagga Wagga - AUSTRALIA

## Flood - Situation as of 13/10/2022

### Delineation MONIT01 - Overview map 01

#### Cartographic Information

1:37000 Full color A1, 200 dpi resolution

0 0.75 1.5 3 km

Grid: WGS 1984 UTM Zone 55S map coordinate system  
Tick marks: WGS 84 geographical coordinate system

#### Legend

<b>General Information</b>	<b>Built-Up Area</b>	<b>Hydrography</b>	<b>Transportation</b>
Flooded area	Residential	Lake	Primary Road
Previous Flooded Area (from previous event)	Office	Land Subject to Foundation	Secondary Road
Area of Interest	Wholesale and retail trade	Sewer	Local Road
Area of Interest	School, university and research	Facilities	Cart Track
Area of Interest	Hospital or medical care	Power and communication line	Distance railway
Area of Interest	Railway	Navigable canal	Airfield runway
Area of Interest	Cemetery	Construction for mining or extraction	Dredged
Area of Interest	Cemetery	New plant construction	Land Use - Land Cover
Area of Interest	Cemetery	River and wetland contributions	Features available in the vector package
Area of Interest	Cemetery	Dump Site	
Area of Interest	Cemetery	Refilling Basin	

#### Consequences within the AOI

	Affected	Total in AOI
Flooded area	ha	1,261.9
Previous flooded area	ha	716.8
Estimated population		54
Built-up	ha	1.3
Transportation	km	12.0
Facilities	km	0.0
Land use	ha	8.6
	ha	16.4
	ha	1,261.9
	ha	36,292.5

Full table available in the vector package

#### Map Information

The Australian Continent continues to experience a prolonged rainfall event. This ongoing weather pattern has now impacted most of the state of New South Wales where a large number of the communities within the area are experiencing severe flooding. Continued and extensive rainfall is expected in the areas of interest over the coming days as well as in the northern part of Victoria. Copernicus EMS RM is required to provide Delineation products with a daily monitoring.

The present map shows the flood delineation in the area of Wagga Wagga (Australia). The thematic layer has been derived from post-event satellite image using a semi-automatic approach. The scale of analysis is 1:25000. The estimated geometric accuracy (RMSE) is 6.25 m or better, from native positional accuracy of the background satellite image. The minimum mapping unit (MMU) is 625 sq. m.

#### Relevant date records (UTC)

Event	12/10/2022 02:30	Situation as of	13/10/2022 20:31
Activation	12/10/2022 08:17	Map production	14/10/2022

#### Data sources

Pre-event image: Sentinel-2A/B (2022) (acquired on 04/09/2022 at 00:18 UTC, GSD 10 m, approx. 0% cloud coverage in AOI, 0° off-nadir angle) provided under COPERNICUS by the European Union and ESA.

Post-event images: COSMO-SkyMed © ASI (2022), distributed by e-GEOS S.p.A. (acquired on 13/10/2022 at 07:04 UTC, the 13/02/2022 at 20:31 UTC, GSD 3 m), provided under COPERNICUS by the European Union and ESA, all rights reserved.

Base vector layers: OpenStreetMap © OpenStreetMap contributors (2022), Wikimapia.org, GeoNames 2015, Copernicus Global Land Service: Land Cover (2016), Global Administrative Areas (2012), refined by the producer.

Inset maps: JRC 2013, Natural Earth 2012, GeoNames 2015.

#### Disclaimer

Products elaborated in this Copernicus EMS Rapid Mapping activity are realized to the best of our ability, within a very short time frame, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original sources. No liability concerning the contents or the use thereof is assumed by the producer and by the European Union.

Please be aware that the thematic accuracy might be lower in urban and forested areas due to inherent limitations of the SAR analysis technique.

Delivery formats are Layered Geospatial PDF, GeoJPEG and vector (ESRI shapefiles, Google Earth KML, GeoJSON).

Map produced by GAF AG released by SERTIT (ODD).
